

Life Skills Lab

ROOM DESCRIPTION:

- **Occupational Skill Training Stations:** These dedicated workstations are equipped with the necessary tools and equipment to provide students with immersive hands-on experiences in practicing occupational skills. These skills span a wide array of job sectors, ranging from office work and retail to hospitality and trades. Students can gain valuable practical insights and hone their abilities in a controlled and supportive environment.
- **Professional Attire and Uniforms:** In addition to skill development, students have access to professional attire and uniforms tailored to different professions. This includes not only clothing but also safety items where needed. By wearing and using these garments, students can become accustomed to the expectations and demands of their chosen fields, helping them feel more confident and prepared for their future careers.
- **Life Skills Practice:** Beyond work training, the facility offers opportunities for students to develop essential life skills. These hands-on experiences encompass tasks such as doing laundry, mastering the art of folding clothing neatly, and efficiently sorting food items. Such life skills are fundamental for personal independence and self-sufficiency, and they empower students to excel both in their professional and everyday lives.
